KING'S ABDICATION CHANGES STATUS OF MEMBERS OF ROYAL FAMILY

When King Edward abdicated the status of all members of the Royal Family changed. The Duke of York became King George VI and the Duchess became Queen Elizabeth, and their two daughters, Princess Elizabeth and Princess Margaret became heirs to the throne. Queen Mary's status was altered because of the accession of the new Queen, and she now becomes the Queen Mother. This interesting picture shows the Queen Mother with three of her grandchildren, Princesses Elizabeth and Margaret Rose, daughters of the King and Queen, and the baby Prince Edward, son of the Duke and Duchess of York. Photo world copyright The Times.

CHRISTMAS BRINGS GOOD CHEER

In the majority of the countries of the world the turkey is almost synonymous with Santa Claus at Christmas time, and particularly in Canada, where millions of turkeys are reared for the Christmas market. Here is a little fellow struggling home with the Christmas turkey, which, apparently did not relish the prospect of meeting the chopper.

ITALY PLEDGED TO RESPECT EMPIRE ROUTES

According to informed circles, Great Britain and Italy have settled their differences in the Mediterranean and reached an accord to guarantee the present balance of power. Observers attach great significance to the visit of Ambassador Dino Grandi (top right) of Italy to the British Foreign Office, where he had a long interview with Sir Robert Vansittart (lower left), British Permanent Under-Secretary of State for Foreign Affairs.

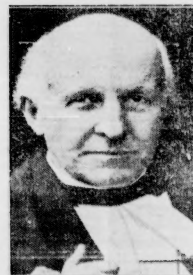

THE RESULT OF A MURDEROUS ONSLAUGHT?

Contrary to first impressions this is not a record of assassinations but the half-way mark in the Eton Wall Game between Collegers and Oppidians. The boys are resting after their strenuous efforts, little realizing they look like the results of a Spanish court martial.

ENGLAND'S HEAVIEST FOUR-YEAR-OLD

Leslie Bowles of Lowestoft, although only four years of age, weighs 118 pounds. Beside him is his brother Reginald, who, at the age of six, weighs 53 pounds. Leslie keeps in good health and is very intelligent for his age.

CRITICIZED

The Archbishop of Canterbury, who has been severely criticized for his recent broadcast, when he attacked the friends of the former King Edward.

BROADCAST OVER EMPIRE

The Duke of Kent, the King's youngest brother, broadcast over an Empire-wide hook-up on December 28 when he spoke in connection with the 10th anniversary of the founding of the province of Cape Colony, now part of the Union of South Africa.

"Won't you take us up to the third floor?" They've forgotten to put in the stairs.
—Sovietkovskaya Ikonostav, Moscow.

FIRST ENDEAVOUR TO PACE CUP CHALLENGER

When Skipper Sopwith sails across the Atlantic with his new Challenger, Endeavour II, he will be accompanied by Endeavour I, which has been loaned to him for a pacesetter prior to the America's Cup, series. The Endeavour I should "capture" the coveted trophy two years ago and it is generally admitted in yachting circles she is the fastest and finest "J" boat ever designed. Above is an excellent picture of the Endeavour I.

ONE OF THE LEAF'S NEWEST RECRUITS

Lee Hamilton has not been long with the Toronto Maple Leafs, but already he has earned a berth on the team. Here he is seen causing the ice to fly as the cameraman "shoots" the action picture.

ITALY'S FUTURE IN THEIR HANDS

This unusual picture brings together before the camera the two men who will probably direct the future destinies of Italy. Crown Prince Humberto, left, destined to assume the throne, and Count Galeazzo Ciano, right, son-in-law of Mussolini, and the man believed to be scheduled as the successor of Duce.

The quota of Canadian barley for brewing and the quota for all honey for the year have been increased by the French government. For the current quarter of the year Canada obtains an additional 4,500 metric quintals of barley for brewing over and above the 2,250 metric quintals already accorded for that term. Canada will also share in the increased quota for honey, both for industrial purposes and for direct consumption. The total 4,500 metric quintals quota for industrial honey for the last quarter of the year has been doubled, and a new quota of 1,500 metric quintals of honey for direct consumption has also been announced. No previous quota was provided for the latter, and both the honey quotas relate to imports from all countries.

ANNUAL MEETING OF W. M. S.
The annual meeting of the Women's Missionary Society of St. Paul's United Church will be held at the home of Mr. Harper, Wednesday, January 6, at 3 p.m.

Season's Greetings to all the people who have done business with me during the year. I wish you every happiness and all the things that go with it, including one dollar a bushel wheat, which I am sure you will find a far-fetched dream, particularly during the year 1937, 1938, and 1939.

I would like you to turn back the clock and remember that the advertiser assisted you through those dark days when the agricultural situation was far from hopeful, and in doing so let out his twenty years' savings. You will have to admit that I was optimistic, because I did this when you had given up any other source of getting credit.

Now I am placed in an impossible position. I have been out of work for a year and have a proposition to go to, but cannot on account of owing several accounts myself; also I am in need of considerable money to carry on the project which I am going into. Therefore I ask those who owe me to consider the position you have placed me in by not paying me when you have one dollar wheat.

I wish to leave the second week in January, and if I do not I will lose the proposition I have. I would ask that you make a special effort to come in and see me and pay back the money that I gave you when wheat was less than fifty cents a bushel.

Evolution goes on, chances come and go, but after all it is said and done the honest man always wins. Legislation may be passed by the Dominion or provincial governments as an emergency measure but no law ever intended to allow a man to hide behind a smoke screen, and the greatest students of economics have proved throughout the world that those people, no matter what circumstances they are placed under, who pay as much as they could. Are today the people who in any community are the most prosperous? The others who do not pay probably use their money in some other manner, thereby destroying their credit, and the reason of the foregoing statement is as follows:

The man who retains his credit gets the opportunity sometimes of buying a quarter section of land or various other things and because his credit is good he can get the big bargains while the other party has no opportunity and has lost anything he ever had unless he has the cash. This is the general considered opinion of students of economics and possibly some of you have listened to the broadcasts of learned Stephen Leacock of McGill University, whose condensed statement means exactly what I have outlined.

I sincerely trust that anyone reading this who owes me money will dwell on what I have said and do his best to pay me back the deals that I have financed with my twenty years' savings, because if not I will lose the proposition I am going to and various other things and I will be under the threat of unemployment. Unless I get most of this money I will lose the proposition I am going into and have about \$2,000 already invested. You can realize my position.

With the new high prices of wheat, surely I can count on you to call in the next few days and make arrangements to clean up the outstanding notes and accounts.

P. A. SHARP.
